SKILLS

github.com/omartorresrios

iOS Swift, Objective-C (Xcode).

Back-End Ruby on Rails, Firebase, Java, C#, PostgreSQL.

Front-End HTML, CSS, ReactJS, jQuery, Bootstrap, SASS, Gulp, Normalize, Browserify.

Others AWS, Heroku, REST API, Git, Scrum, DialogFlow, Mixpanel, Apiary, BitBucket, YouTrack.

EXPERIENCE

iOS Developer, Mambo • Aug. 2017 — Feb. 2018

[Mambo](#) is an innovation consultancy family. Works with top brands like P&G and Scotiabank across Latin America.

- I worked on a Scotiabank app called [ClubS](#). It is written completely in Objective-C. I had the responsibility to change the design pattern of the project, from MVC to MVVM. And refactor the code.

Co-Founder (Director, Full Stack Engineer), Newdot • Mar. 2016 — Dec. 2017

[Newdot](#) was created to help people share the topics they dominate and increase their professional value. Unfortunately due to lack of use, the data was lost. But it's still functional.

- Developed in Ruby on Rails, ReactJS and PostgreSQL. Works with Elasticsearch, a search engine to find users, posts and topics. Sidekiq is used for working queues and Redis to store all of its job and operational data.
- The majority of users were students and professors of the Universidad del Pacífico. We reached about 800 users, 150+ posts and 50+ tags in 6 months.

Co-Founder (CEO), Bnode • Jan. 2015 — Nov. 2015

Bnode's mission was to empower students of the Universidad del Pacífico face the future.

- I led a team of 8 volunteers from different careers and universities.
- I coordinated with different areas of the Universidad del Pacífico (Emprende UP, Faculty of Business Engineering, Logistics) with the objective of carrying out an educational event that brings together the private, public and academic sectors to talk about the future of the education in the country.

Co-Founder (Director) & Main Professor, Thinkdoers (Banco de Crédito BCP) • Oct. 2013 — Jul. 2014

[Thinkdoers](#) was a project funded by [BCP](#). 18 students in grades 3 through 5 were taught techniques and methodologies of creativity and innovation and encouraged to create a business.

- I taught methodologies like Design Thinking, Customer Development, Lean Startup and Business Model Generation.

PROJECTS

Technology Reporter, Gufi • Jun. 2018 — Present

[Gufi](#) is a space where the most relevant news of the digital technology industry is shared. It also analyzes how technology is configuring new scenarios in our lives, today and tomorrow.

Co-Founder (iOS Engineer), Dots • Oct. 2017 — Feb. 2018

[Dots](#) allows to visualize the professional value of people, either by recording their most important moments as well as leaving reviews or receiving them from their colleagues.

- It has two main functionalities: record moments through video ([SwiftlyCam](#) framework) and leave reviews through audio ([AudioBot](#) framework). I worked with AVFoundation.
- I built it using [Google Speech Recognition](#) technology and Ruby on Rails as backend.

Co-Founder (iOS Engineer), Gouto • May. 2017 — Aug. 2017

Gouto (Waiting for review) is a tool that allows people to leave reviews (anonymous if they wish) to others based on their actions (positive or negative).

- Developed programmatically, without using Storyboard. It has two versions: one in production with Firebase and the other with own backend (Rails).

Co-Founder (iOS Engineer), Answr • Sep. 2016 — Aug. 2017

[Answr](#) is a social network to ask and answer anonymously.

- It was built with Swift and Firebase as backend. I used Storyboards.

EDUCATION

Business Engineering, Universidad del Pacífico, Perú • 2013 — 2015

Informatics Engineering, Universidad Católica Sedes Sapientiae, Perú • 2008 — 2011

CONNECTION/REFERENCE

Daniel Vidaurre - Chief Technology Officer (CTO), Mambo

- Daniel saw my evolution within the company. His email is daniel@mambo.pe and his phone number is +51 987 811 196.

INTERESTS

I like reading books, ranging from science fiction, to biographies and technology.

Playing soccer (before i played professionally).

I like the Star Trek world and I often dream about it.
